### FUN FACTS ABOUT THIS MONTH'S PLACE

## Lava Beds National Monument

1.The Lava Beds are made up of more than 800 caves from the lava flow by the Medicine Lake Volcano. The lava tubes were formed when the outside lava flow cooled and hardened while the molten lava kept flowing inside.

2.The Modoc War began with the Balle of Lost River on November 29, 1872, when U.S. Army troops tried to force a band of Modoc people from their homeland along the Lost River back to the Klamath Reservation.

3. Keintpoos, also known as Captain Jack, and his band took refuge in the natural lava fortress, now call Captain Jack's Stronghold. The caves and trenches gave Modoc families shelter and helped warriors defend against the U.S. Army.

4. Petroglyph Point has more than 5,000 petroglyphs, or rock carvings.

5. Cave explorer Ross Musselman, reported finding the Valentine Cave on February 14, 1933. Look closely near the entrance and you'll see where two passages form a heart-like shape.
